## THIS AGENCY IS AN EQUAL OPPORTUNITY PROVIDER

The **USDA** is an equal opportunity provider and employer. Anyone, who believes they have been discriminated against by a Forest Service conducted program, on the basis of race, color, national origin, gender, religion, age, disability, political beliefs, sexual orientation, and marital or family status, has the right to file a complaint.

It is the policy of the **Idaho Department of Lands** to recruit, select, assign, transfer, pay, promote, train, evaluate, and retain employees of the Department on the basis of merit without regard to race, color, religion, national origin, sex, age, physical/mental disability or covered veterans status.

## A message from Idaho's State Forester, Winston Wiggins

During 2004, Idaho's counties and communities continued to make great strides toward becoming more resilient to wildland fire. At the local level, first iterations of County Wildland Fire Mitigation Plans are nearly complete throughout the state. Many county wildland fire interagency groups are updating their plans to ensure that the *Healthy Forests Restoration Act Community Wildfire Protection Plan* guidelines are achieved. Our federal partners are working toward aligning their plans to treat hazardous fuels in the wildland urban interface with their local county wildland fire interagency groups' plans and projects. Hazardous fuels reduction projects on the non-federal lands within

and adjacent to our communities are being accomplished widely throughout the state. Our fire districts continue to enhance their capabilities to respond to wildland fire.

At the state level, the Idaho State Fire Plan Working Group continues to provide leadership, guidance, and strives for a unified approach to providing funds to counties and communities to assist with the implementation of their plans. The National Fire Plan Office in Washington D.C., on behalf of the Secretaries of Agriculture and Interior, recognized the outstanding efforts at statewide collaboration by the Idaho State Fire Plan Working Group. The Working Group was awarded the 2004 National Fire Plan Award for collaboration at the 3<sup>rd</sup> Annual National Fire Plan Award Ceremony in Albuquerque, New Mexico (see photo).

**Photo Left:**

Left to right, back row:

Rebecca Watson, Department of the Interior, Assistant Secretary, Land and Minerals Management; Robert Cope, Idaho Assn. of Counties, Lemhi County Commissioner; Jim Caswell, Administrator, Office of Species Conservation; Ken Kiser, Cooperative Fire Specialist, USDA Forest Service; Ben Estes, President, Idaho Fire Chiefs Assn.; Dave Tenny, Natural Resources and Environment Deputy Undersecretary Forestry

Left to right, front row:

Gene Lonning, Fuels Specialist, Bureau of Indian Affairs; Peg Polichio, Idaho National Fire Plan Coordinator – USFS, Idaho Department of Lands; Susan Giannettino, Deputy State Director, Natural Resources, Idaho Bureau of Land Management; Dennis Seidman, Refuge Operations Support, US Fish & Wildlife Service

County, community, state, federal, tribal, and citizen partners at the local level deserve commendation for their considerable efforts and accomplishments. I am confident that, due to the dialogue in which we have engaged and the investments that have been made in Idaho during the past several years, our communities and counties will be more resilient to wildland fire when it strikes next.

Winston Wiggins  
Director and State Forester  
Idaho Department of Lands

# Introduction

## Purpose of this report:

This report serves two purposes; first—to communicate the collective community assistance activities of the members of the Idaho State Fire Plan Working Group during 2004, and second—to document how the Idaho Department of Lands has delivered our National Fire Plan programs and projects in Idaho during 2004.

## What this report does not cover:

The appropriate federal agency should be contacted for details regarding federal projects on federal lands.

# Idaho

## State Fire Plan

### Working Group

## Part 1: Idaho State Fire Plan Working Group (ISFPWG)

### Who we are

- Idaho Department of Lands, Chair
- US Forest Service
- Idaho Association of Counties
- Bureau of Land Management
- Idaho Fire Chiefs Association
- US Fish and Wildlife Service
- Idaho State Fire Marshal
- Idaho Bureau of Homeland Security
- Idaho Resource Conservation and Development Association Coordinators
- FEMA (No current rep.)
- Idaho Department of Commerce and Labor
- National Park Service
- Bureau of Indian Affairs
- Nez Perce, Coeur d' Alene, and Shoshone Bannock Tribes
- Office of the Governor

### What we do

- **Collaborate** - Share Information – Work toward Goals of the Western Governors' 10-Year Comprehensive Strategy and Its Implementation Plan.
- **Encourage** formation of County Wildland Fire Interagency Groups comprised of all local citizens, stakeholders, and state, tribal, and federal partners. We have funded and assisted with the development of County Wildland Fire Assessment and Mitigation Plans. County plans and revisions are striving for compliance with:
  - Idaho Statewide Implementation Strategy for the National Fire Plan (2002)
  - Bureau of Homeland Security/FEMA Wildland Fire Chapter of the All Hazards Pre-Disaster Mitigation Plan
  - Healthy Forests Restoration Act of 2003

County plans may be viewed on the Web at:

[http://www2.state.id.us/lands/nat\\_fire\\_plan/county\\_wui\\_plans/index.htm](http://www2.state.id.us/lands/nat_fire_plan/county_wui_plans/index.htm)

- **Prioritize** projects as requested by agencies.
- **Align** work on non federal and federal land to provide most effective fuelbreak work toward community protection at the wildland urban interface.
- **Integrate** state, federal, tribal, and local program funds from willing members for most effective outcomes.
- **Educate** on availability of grant resources to assist with implementation.

Visit Grant Families on the Web for more information:

[http://www2.state.id.us/lands/nat\\_fire\\_plan/grant\\_family\\_2003/grant\\_families.htm](http://www2.state.id.us/lands/nat_fire_plan/grant_family_2003/grant_families.htm)

- Provide a **Scientific** basis to aid with prioritization of projects – Idaho Risk Assessment.

## **A summary of project and program prioritization process during 2004:**

### *Collaborative Prioritization at the State Level*

During 2004, there were four program areas in which collaborative prioritization of projects by the Idaho State Fire Plan Working Group occurred. These four program areas now have fairly well established, well understood ground rules and criteria for selection developed by the Working Group to meet program intent.

- IDL/FS Volunteer Fire Assistance
- IDL/FS Western States Fire Managers Hazardous Fuels Treatment (State Fire Assistance)
- IDL/FS Community Fire Protection (*formerly Stevens* - Hazardous Fuels Reduction on non federal lands adjacent to active FS projects.)
- Forest Service Region 4 – Federal projects on Forest Service lands; projects in the wildland urban interface.

### *Collaborative prioritization of projects by County Wildland Fire Interagency Groups, Local Emergency Planning Committees, or by Local Fire Managers:*

- “High hazard/high priority” areas for hazardous fuels reduction – non federal lands primarily in County Wildland Fire Mitigation plans.
- Federal projects on federal lands adjacent to communities - beginning to be identified in County Plans as part of the Healthy Forests Restoration Act updates.
- BLM Rural Fire Assistance (RFA) – collaborative selection by local fire managers at the field office or district level. Federal and state cooperators are invited to participate.

### *Agency prioritization and selection of projects at regional, state, or local office levels. Projects for these programs are selected by the sponsoring agency. Each agency then reports their selection to the Idaho Department of Lands for inclusion in this annual report to capture our collective accomplishments.*

- BLM Communities at Risk (CAR).
- F&WS Rural Fire Assistance (RFA).
- National Park Service – (RFA).
- Bureau of Homeland Security/FEMA hazard mitigation projects.
- FEMA – Assistance to Firefighter Grants (AFG) – Data obtained from website FEMA.gov.
- Idaho Fire Chiefs Association Firefighters License Plate Fund program.
- Federal projects on federal lands – agency selection.
- Tribal projects on tribal trust lands and projects to be conducted with adjacent communities – Tribe/BIA selection.

- **Please see the following tables and charts for a complete summary of ISFPWG members’ combined accomplishments for 2004.**

This report serves as the Idaho State Fire Plan Working Group's joint summary documenting the collective program efforts in Idaho as reported to us by our participating agencies. (FEMA data obtained from US Department of Homeland Security Web site <http://www.firegrantsupport.com/winnersSearch.aspx> Assistance to Firefighters Grant Program for FFY 2004). The intent of this table is to display data for projects on non federal lands only. Projects on tribal trust lands are included. The reporting of this data continues to be refined.

## State of Idaho Fire Plan Assistance 2001 – 2004

County	Grant Recipient	Granting Agency	2001-2003	2004	Project Description
Multi-County	Bear River RC&D	IDL/FS SFA	\$31,500.00		Demo Sites/Education
Multi-County	Clearwater RC&D	BLM CAR		\$58,000.00	Wet Gulch Fuel Break (Hazardous Fuel Reduction)
Multi-County	Clearwater RC&D	IDL/FS SFA	\$30,000.00		Demo Sites/Education
Multi-County	Coeur d'Alene Tribe	BIA HFR/WUI		\$109,000.00	Full Time Staff (& 10 Seasonal Positions based on project funds.)
Multi-County	Dawes ( U of Idaho)	IDL/FS SFA	\$42,079.00		Demo Sites/Education

Washington	Weiser City FD	IFCA FFLPF		\$1,600.00	Fire Training Simulator/Digital Camera

This report serves as the Idaho State Fire Plan Working Group's joint summary documenting the collective program efforts in Idaho as reported to us by our participating agencies. (FEMA data obtained from US Department of Homeland Security Web site <http://www.firegrantsupport.com/winnersSearch.aspx> Assistance to Firefighters Grant Program for FFY 2004). The intent of this table is to display data for projects on non federal lands only. Projects on tribal trust lands are included. The reporting of this data continues to be refined.

County	Grant Recipient	Granting Agency	2001-2003	2004	Project Description
Washington	Weiser City FD	IFCA FFLPF	\$500.00	\$475.00	Training/ Training the Trainers
Washington	West Central Highlands RC&D	BLM CAR	\$35,000.00		Wildfire Mitigation Plan
Washington	West Central Highlands RC&D	BHS	\$18,000.00		All-Hazards Mitigation Plan
Washington	West Central Highlands RC&D	IDL/FS SFA		\$210,000.00	Hazardous Fuels Treatment
<b>Washington Total</b>			<b>\$272,811.96</b>	<b>\$309,433.00</b>	
<b>Total</b>			<b>\$29,836,855.21</b>	<b>\$8,796,348.70</b>	<i>Includes FEMA</i>
<b>Grand Total 2001 - 2004</b>			<b>\$38,633,203.91</b>		<i>Includes FEMA</i>

- It is the policy of the Idaho Department of Lands to monitor projects to ensure effective use of hazardous fuels treatment funds. Periodically, funds are withdrawn and reallocated to new projects.

Reallocated Funds				
		Awarded	Expended	
Hope	IDL/FS SFA	\$506,565.00	\$196,547.66	HFT WUI (\$195,775.66 as of 1/05 - Balance Reallocated)
Island Park	IDL/FS SFA	\$506,565.00	\$69,658.42	HFT/Homeowner Ed. (\$69,658.42 as of 12/04 - Balance Reallocated)
Dixie	IDL/FS SFA	\$22,289.00	\$36,236.06	HFT/Homeowner Ed.
Yellow Pine	IDL/FS SFA	\$107,392.00	\$83,469.98	HFT WUI (\$83,469.98 expended as of 12/04 - Balance Reallocated)
Elk City Alliance	IDL/FS NFA	\$30,000.00	\$7,776.75	HFT (\$7,776.75 expended as of 12/04 - Balance Reallocated)
IDL-Hope Stevens	IDL/FS NFA	\$110,000.00	\$0.00	Funds to be Reallocated in next NFA (Stevens) round in Spring 2005.
Kootenai/Shoshone	IDL/FS SFA	\$252,300.00	\$43,500.00	Expenditure reallocated to GAPOO - Balance of \$208,800 to be reallocated.
		<b>\$1,537,111.00</b>	<b>\$437,188.87</b>	
			<b>\$1,099,922.13</b>	<b>Total Reallocated to Other Projects – 2001-04</b>

## Part 2:

# The Idaho Department of Lands 2004 National Fire Plan Programs Report

For over fifty years, a strong partnership has existed in Idaho between the Idaho Department of Lands and the State and Private Forestry branch of the United States Forest Service. These partners work together to deliver four programs to achieve the goals of the National Fire Plan in Idaho. During 2004, these four programs included:

1. **The Idaho Department of Lands State Fire Assistance Hazardous Fuels Treatment Program**
2. **The Idaho Department of Lands National Forest Adjacent Community Fire Protection (Formerly Stevens) Hazardous Fuels Treatment Program**
3. **The Idaho Department of Lands Volunteer Fire Assistance Program**
4. **The Fuels for Schools Program**

### 1. IDL State Fire Assistance HFT Program (IDL/FS SFA Program)

The IDL-HFT program is the primary incentive program at work in Idaho for landowner assistance with reduction of hazardous fuels on non federal lands. Federal funds for this program are allocated from the Forest Service to the Idaho Department of Lands under the cooperative fire authority, State Fire Assistance. This is a cost-share program, with the State providing a match to federal funds.

#### 2004 SFA Process:

<b>September 15</b>	<b>Counties and Communities</b>
2004 Grant Application due to Idaho Department of Lands Area Supervisors. Area Supervisors names and addresses, grant objectives, criteria, and applications available at <a href="http://www.idaho.gov/lands">www.idaho.gov/lands</a> .	
<b>October 1</b>	<b>IDL Area Supervisors</b>
Submit reviewed grant applications from Counties and Communities to HFT Manager, at the IDL Coeur d'Alene office. (Review guidance to Area Supervisors will be sent under separate cover.)	
<b>October 1-3</b>	<b>IDL HFT Manager, Fire Plan Coordinator, Bureau Chief</b>
Review submitted grant applications to see if any may qualify for other available assistance programs in Idaho, such as the "Hazardous Fuels Reduction Work Near National Forest Lands" program.	
<b>October 6-10</b>	<b>Idaho State Fire Plan Working Group</b>
Review and prioritize grant applications.	
<b>October 17</b>	<b>IDL HFT Manager</b>
Submit applications to the Western State Fire Managers (WSFM) Competitive Grant Program.	
<b>March 1</b>	<b>IDL HFT Manager</b>
Notification of successful grant recipients in Idaho from WSFM national process. Notify successful grant recipients. Develop Memorandum of Understanding (MOU) and appropriate financial documentation with successful grant recipients	

## 2004 SFA Awards:

County	Grant Recipient	Granting Agency	2004	Project
Adams	MeadowCreek HOA	IDL/FS SFA	\$36,000.00	Hazardous Fuels Treatment
Benewah	Benewah County	IDL/FS SFA	\$360,000.00	Hazardous Fuels Treatment
Bonner	Bonner County	IDL/FS SFA	\$216,000.00	Hazardous Fuels Treatment
Boundary	Boundary County	IDL/FS SFA	\$290,000.00	Hazardous Fuels Treatment
Idaho	BPC VRFD	IDL/FS SFA	\$17,800.00	Hazardous Fuels Treatment
Multi-County	Three Rivers RC&D	IDL/FS SFA	\$472,000.00	Hazardous Fuels Treatment
Shoshone	Shoshone County	IDL/FS SFA	\$350,400.00	Hazardous Fuels Treatment
Teton	Teton County FPD	IDL/FS SFA	\$61,000.00	Hazardous Fuels Treatment
Valley	GAPOO HOA	IDL/FS SFA	\$43,500.00	Hazardous Fuels Treatment
Valley	McCall, City of	IDL/FS SFA	\$16,800.00	Hazardous Fuels Treatment
Washington	West Central Highlands RC&D	IDL/FS SFA	\$210,000.00	Hazardous Fuels Treatment
Total			\$2,073,500.00	

## 2. IDL National Forest Adjacent Community Fire Protection (Formerly Stevens) HFT Program (IDL/FS NFA)

The Western States had formerly referred to another type of federal hazardous fuels reduction dollars as “Stevens” funds in recognition of Senator Ted Stevens of Alaska who sponsored this authority. We now know this program as “Community Fire Protection”. These monies are actually federal hazardous fuels reduction funds that may be used on either the National Forests or, at the discretion of the Forest Service Regional Forester, used for work on non federal lands adjacent to National Forest projects. There is no required match with these funds, though projects with local investment are encouraged. The following language was included in the initiating legislation (the 2002 appropriations bill) and applies today in reference to these funds:

- “...may be used on adjacent non-Federal lands for protecting communities when hazards reduction is planned on national forest lands that have the potential to place such communities at risk...”
- “...to plan and implement projects specifically designed to protect communities from wildland fires where and when hazardous fuel reduction activities (prescribed fire) on NFS lands have the potential to place these communities at risk from wildland fire...”
- “...the time between project initiation on NFS lands and non-Federal lands should not exceed 3 years...”
- “Projects should focus on the most high-risk areas to decrease risks to the community, rather than scattered in numerous projects...”

## 2004 NFA Community Fire Protection (Formerly Stevens) Process:

NATIONAL FOREST ADJACENT Community Fire Protection GRANT PROCESS (Formerly Stevens)		
MAY/JUNE 2004		
DATE	EVENT	WHO NEEDS TO DO WHAT
<b>MAY 3</b>	APPLICATION DEADLINE	IDL Fire Bureau to copy applications, summarize, send out to IDL Areas, FS Forest Supervisors, and State Working Group for review.
<b>MAY 10</b>	APPLICATIONS BY AREA/ FOREST OUT FOR LOCAL PRIORITIZATION AND COMMENT	IDL Area Supervisors (or Wardens), FS Forest Supervisors (or Forest FMO's) review applications from within your Area/Forest.
<b>MAY 20</b>	CONFERENCE WITH AREA SUPERVISORS AND FOREST SUPERVISORS	IDL Area Supervisors and FS Forest Supervisors conference call to recommend projects for prioritization at 1300 PDT
<b>MAY 21</b>	CONFERENCE WITH IDAHO STATE FIRE PLAN WORKING GROUP - RECOMMENDATIONS	Idaho State Fire Plan Working Group conference call to recommend prioritization of grants at 1300 PDT
<b>MAY 24</b>	PRESENT TO DIRECTOR FOR REVIEW/APPROVAL	IDL Fire Bureau present recommendations to State Forester for final approval
<b>JUNE 1</b>	NOTIFICATION TO SUCCESSFUL GRANT RECIPIENTS	IDL Fire Bureau to notify successful recipients by phone and e-mail. Work out details of MOUs and agreements.

## 2004 NFA Community Fire Protection Grant Awards (Formerly Stevens)

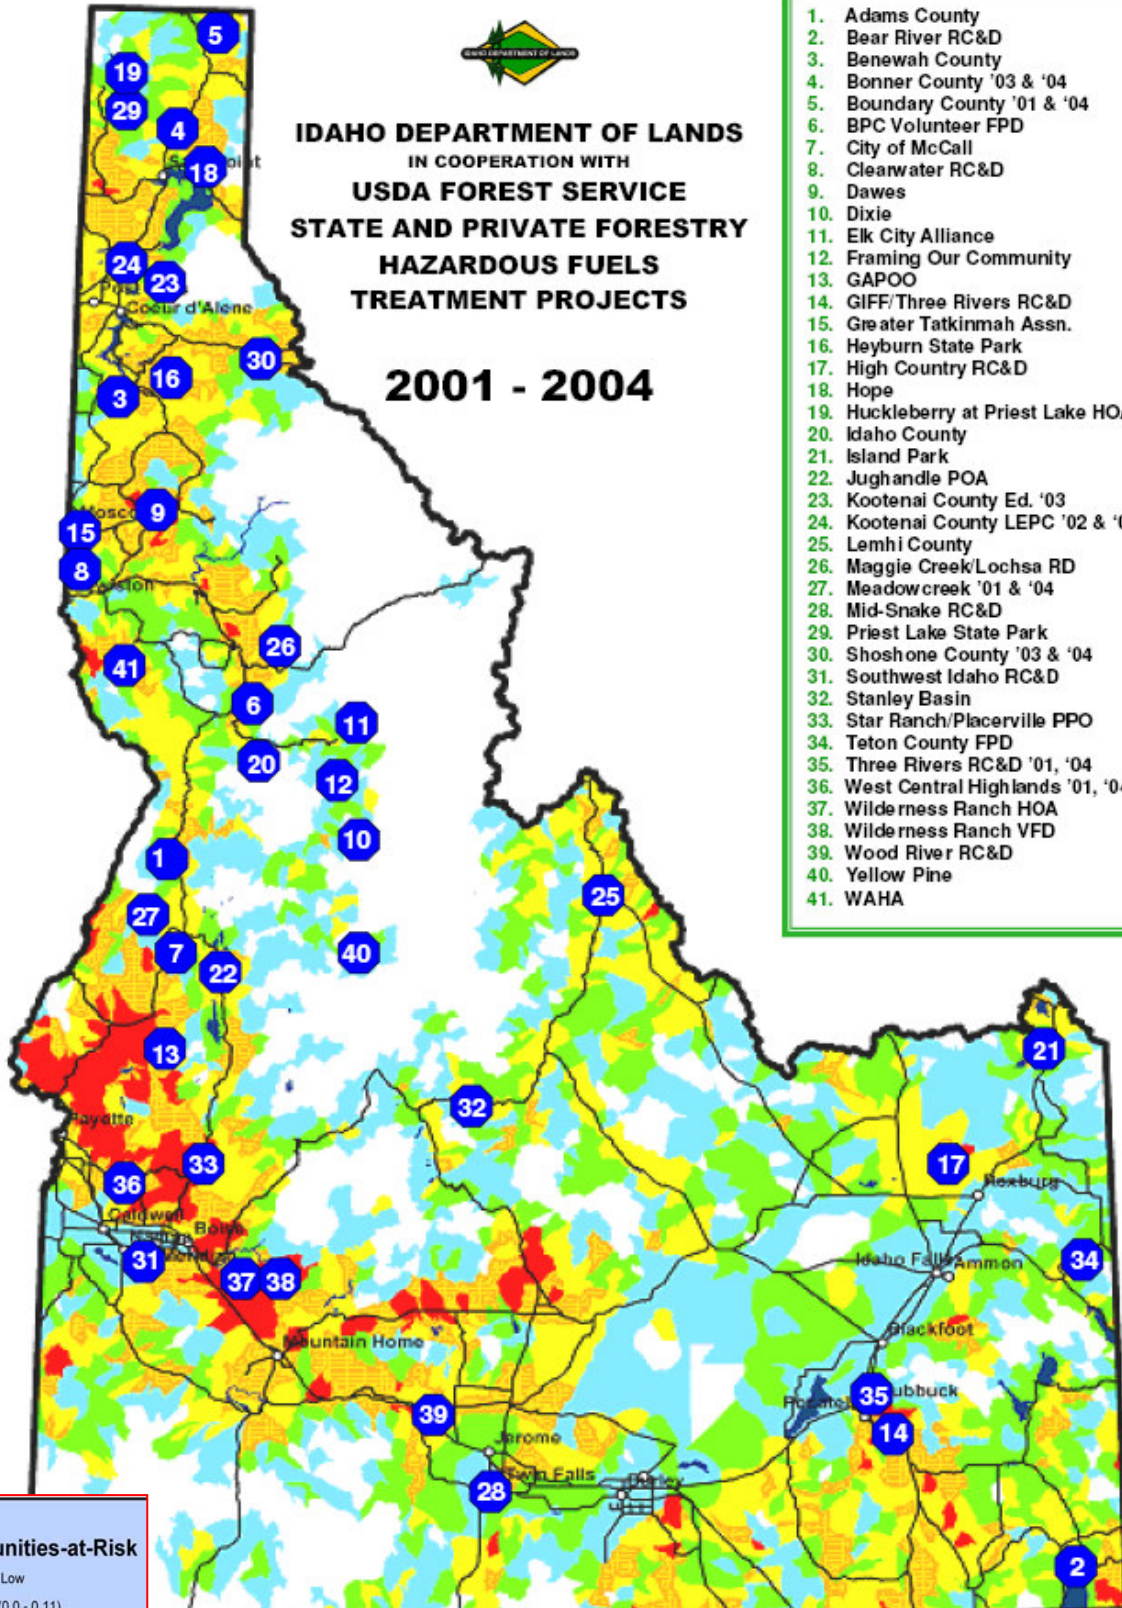

County	Grant Recipient	Granting Agency	2004	Project Description
<b>Adams</b>	Adams County	IDL/FS NFA	\$84,000.00	Hazardous Fuels Treatment
<b>Boise</b>	Star Ranch/Placerville	IDL/FS NFA	\$85,000.00	Hazardous Fuels Treatment
<b>Bonner</b>	Bonner County	IDL/FS NFA	\$264,850.00	Hazardous Fuels Treatment
<b>Idaho</b>	BPC VRFD	IDL/FS NFA	\$8,400.00	Hazardous Fuels Treatment
<b>Idaho</b>	Framing Our Community Inc.	IDL/FS NFA	\$30,500.00	Hazardous Fuels Treatment
<b>Idaho</b>	Idaho County	IDL/FS NFA	\$60,000.00	Hazardous Fuels Treatment
<b>Lemhi</b>	Lemhi County	IDL/FS NFA	\$7,000.00	Hazardous Fuels Treatment
<b>Lewis</b>	IDL Maggie Creek/FS Lochsa RD	IDL/FS NFA	\$2,000.00	Hazardous Fuels Treatment
<b>Multi- County</b>	GIFF/Three Rivers RC&D	IDL/FS NFA	\$17,000.00	Hazardous Fuels Treatment
<b>Shoshone</b>	Shoshone County	IDL/FS NFA	\$230,250.00	Hazardous Fuels Treatment

# HAZARDOUS FUELS TREATMENT GRANTS MONITORING REPORT

State Fire Assistance and National Forest Adjacent Community Fire Protection (*Formerly Stevens*)

<b>PROGRAM:</b> HFT/SFA <input type="checkbox"/> HFT/NFA <input checked="" type="checkbox"/>		<b>DATE:</b> March 1, 2005
<b>Project Name:</b> Adams County		
<b>Project/Grant No.:</b> 04NFA4 02	<b>Location:</b> R1ET20N and R1ET21N Circle C PUD Area, Adams County	
<b>Grant Year:</b> 2004		
<b>Start Date:</b> Not begun as of 11/04	<b>Latitude:</b> 45 degrees 7 minutes <b>Longitude:</b> 116 degrees 22 minutes	
<b>Completion Date:</b>		
<b>Project Manager:</b> Don Horton		
<b>E-Mail:</b> building@co.adams.id.us	<b>Phone:</b> 208-253-6125	
<b>Award Amount:</b> \$84,000	<b>Adjacent to: FS Project:</b> <input checked="" type="checkbox"/> <b>Name of Adjacent Project:</b> Payette NF, Middle Little Salmon Project	
<b>Total Structures Treated (Proposed):</b> 20 <b>Total Structures Treated to Date:</b> 0	<b>Total Acres Treated (Proposed):</b> 42 <b>Total Acres Treated to Date:</b> 0 <b>Average Cost per Acre \$</b> 1000.00 Estimated	
<b>Project Partners:</b> US Forest Service, Idaho Department of Lands, Northwest Management, Inc., SITPA, BLM		
<b>Purpose Summary:</b> Treat fuels to reduce fire risk on non-federal land adjacent to the Middle Little Salmon Vegetation Management Project of the USFS.		

<b>PROGRAM:</b> HFT/SFA <input checked="" type="checkbox"/> HFT/NFA <input type="checkbox"/>		<b>DATE:</b> March 1, 2005
<b>Project Name:</b> Bear River RC&D		
<b>Project/Grant No.:</b> 01SFA4 11	<b>Location:</b> Bear River RC&D area which includes Bear Lake, Oneida, Franklin, and Caribou Counties.	
<b>Grant Year:</b> 2001 - Awarded 2003		
<b>Start Date:</b> May 2005 (planned)	<b>Latitude:</b> 42 Degrees 15' North <b>Longitude:</b> 111 Degrees 25' West	
<b>Completion Date:</b> August 2005 (planned)		
<b>Project Manager:</b> Scott Ferguson		
<b>E-Mail:</b> Scott.Ferguson@UT.usda.gov	<b>Phone:</b> 435-753-3871 ext. 34	
<b>Award Amount:</b> \$31,500	<b>Adjacent to: FS Project:</b> <input type="checkbox"/> <b>Name of Adjacent Project:</b>	
<b>Total Structures Treated (Proposed):</b> 30-50 <b>Total Structures Treated to Date:</b> 0	<b>Total Acres Treated (Proposed):</b> 1 <b>Total Acres Treated to Date:</b> 0 <b>Average Cost per Acre \$</b>	
<b>Project Partners:</b> Idaho Community Forester, AmeriCorp		
<b>Purpose Summary:</b> Train three AmeriCorp workers to perform home evaluations for protection against wildfire. Twelve weeks of home evaluations within RC&D area. Conduct one fuels reduction demonstration project. One week entering field data utilizing Red Zone Software

<b>Purpose Summary:</b> Hazardous Fuels Treatment to create fuel break and defensible space around six structures.		

<b>PROGRAM:</b> HFT/SFA <input checked="" type="checkbox"/> HFT/NFA <input type="checkbox"/>		<b>DATE:</b> March 1, 2005
<b>Project Name:</b> McCall, City of		
<b>Project/Grant No.:</b> 04SFA 16	<b>Location:</b> City property north of the McCall Municipal Airport	
<b>Grant Year:</b> 2004		
<b>Start Date:</b> August 2004	<b>Latitude:</b> 44 53 22.9050N <b>Longitude:</b> 116 06 04.6400W	
<b>Completion Date:</b> June 30, 2005		
<b>Project Manager:</b> Carol Coyle		
<b>E-Mail:</b> ccoyle@mccall.id.us	<b>Phone:</b> 208-634-3504	
<b>Award Amount:</b> \$16,800	<b>Adjacent to: FS Project:</b> <input type="checkbox"/> <b>Name of Adjacent Project:</b>	
<b>Total Structures Treated (Proposed):</b> <b>Total Structures Treated to Date:</b>	<b>Total Acres Treated (Proposed):</b> 22 originally <b>Total Acres Treated to Date:</b> will treat 15 <b>Average Cost per Acre:</b> \$ 1120.00 Estimated	
<b>Project Partners:</b> McCall Tree Committee, McCall Airport Manager, McCall FPD, McCall Cemetery, IDL, Idaho Department of Parks		
<b>Purpose Summary:</b> The project includes removal and piling of trees and slash on the parcel of land (15 acres of City property). Thin trees (primarily Lodge Pole Pine) to approximately 15' x 15' spacing, remove standing dead/downed wood debris, and prune all remaining trees to at least a 10' height retention or 1/3 live crown. The removed trees will be permitted to leave a maximum 6-inch tree stump. Retain tree species such as Douglas fir, Aspen, Ponderosa Pine, and Grand Fir unless otherwise identified and marked for removal. Retain shrubs and living undergrowth. The City of McCall encourages contractors to salvage merchantable wood. The awarded contractor will pile debris at the minimum height of 4' and 6' in diameter.

<b>Total Structures Treated (Proposed):</b> 0 <b>Total Structures Treated to Date:</b> 0	<b>Total Acres Treated (Proposed):</b> 120.1 <b>Total Acres Treated to Date:</b> 21 <b>Average Cost per Acre:</b> \$ 1103.00	
<b>Project Partners:</b> Wilderness Ranch Common Area Committee; Wilderness Ranch Volunteer Fire Department; Firewise Communities USA; Tarter, Stockton & Petzak; Mores Creek Ambulance		
<b>Purpose Summary:</b> Reasonable fuel reduction measures in Wilderness Ranch Common area that will reduce the risk of spread of fire and allow for ground-based fire fighting equipment to safely suppress wildfires under normal fire weather conditions. Trees should be thinned to a spacing that allows no crowns to touch. The largest, best-formed trees would be left, removing mainly younger age trees. Brush would also be cut. A recommended width of treatment area below the roads is 120 feet due to the steepness of the slopes. Reserved trees below the roads would be pruned up to 6 feet. Slash piles created will be chipped and burned using volunteer labor.

# HAZARDOUS FUELS TREATMENT GRANTS MONITORING REPORT

State Fire Assistance and National Forest Adjacent Community Fire Protection (*Formerly Stevens*)

<b>PROGRAM:</b> HFT/SFA <input checked="" type="checkbox"/> HFT/NFA <input type="checkbox"/>		<b>DATE:</b> March 1, 2005
<b>Project Name:</b> Yellow Pine		
<b>Project/Grant No.:</b> 01SFA4 50	<b>Location:</b> 30 miles E of McCall	
<b>Grant Year:</b> 2001		
<b>Start Date:</b> October 9, 2001	<b>Latitude:</b> 44 57.90 <b>Longitude:</b> 115 29.60	
<b>Completion Date:</b> June 4, 2004		
<b>Project Manager:</b> John Lillehaug		
<b>E-Mail:</b> jlillehaug@idl.state.id.us	<b>Phone:</b> 208-634-7125	
<b>Award Amount:</b> \$83,469.98	<b>Adjacent to: FS Project:</b> <input checked="" type="checkbox"/> <b>Name of Adjacent Project:</b> see below	
<b>Total Structures Treated (Proposed):</b> 81 <b>Total Structures Treated to Date:</b> 81	<b>Total Acres Treated (Proposed):</b> 319 <b>Total Acres Treated to Date:</b> 319 <b>Average Cost per Acre:</b> \$ 261.66	
<b>Project Partners:</b> Idaho Department of Lands, US Forest Service, Boise and Payette National Forests.		
<b>Purpose Summary:</b> Hazardous Fuels Reduction within the townsite of Yellow Pine and on the Eiugren Ranch. It consisted of pruning, thinning and burning outside the defensible space as well as simular practices around the buildings with additional efforts such as clearing roofs and porches of flammable or hazardous materails.(see notes below for federal land).		

## Status of the IDL/FS State Fire Assistance (SFA) and National Forest Adjacent Community Fire Protection (*Formerly Stevens*) Hazardous Fuels Treatment Program Since 2001:

Cumulatively, from early 2001, at the inception of the National Fire Plan funding initiative, through the end of 2004, as reported in the IDL- HFT monitoring report, **6,123** acres have been treated under this program on non federal lands in Idaho. This is a conservative estimate of acreage accomplished, as only known accomplished acres are reported here.

### 3. Idaho Department of Lands Volunteer Fire Assistance Program (IDL/FS VFA Program)

The IDL VFA program is a cooperative cost-share program between US Forest Service State and Private Forestry and Idaho Department of Lands. The partners share costs of this program at a 50:50 rate. The purpose of this program is to assist with organizing, equipping, and training of local fire districts. In 2004, **39** rural volunteer fire departments received VFA awards totaling **\$170,314.70**.

County	Grant Recipient	2004	Project Description
Bannock	Chubbuck FD	\$4,000.00	Personal Protective Equipment
Bannock	Inkom FD	\$5,372.70	Personal Protective Equipment
Bannock	Pocatello Valley FPD	\$12,000.00	SCBAs
Bear Lake	Bear Lake County FD	\$8,000.00	Personal Protective Equipment

Teton	Teton County FPD	\$3,600.00	Personal Protective Equipment
<b>Total</b>		<b>\$170,314.70</b>	

#### 4. Fuels for Schools Program

The Fuels for Schools (FFS) program in Idaho is a partnership program between the State Foresters, the Regional Foresters in Regions 1 and 4 of the USDA Forest Service, and the Panhandle Lakes RC&D. The purpose is to expand the use of small-diameter trees and slash removed in fire hazard reduction projects to heat local public schools and demonstrate the practicality, economy, and positive environmental impact of heating using biomass fuels. The program was announced in an open letter to Idaho's public school superintendents in June 2003.

The Forest Service has allocated a total of \$1,040,023 to the Idaho FFS program at this time. The funds include \$50,000 to assist the Idaho Department of Lands in providing staff for program development. The funds remaining are to be used to fund Fuels for Schools projects in Idaho.

Preliminary Assessment Engineering studies of twelve schools are in progress or have been completed by CTA Architects Engineers, Inc. The school districts are St. Maries, Plummer/Worley, Cascade, Grangeville, Priest River (West Bonner), Soda Springs, Adams County, Challis, Council, Bonners Ferry, Sandpoint, and Kellogg.

At the time of this report, one demonstration project has been selected, one project was declined by a community, and one project has been offered to a community and is pending a decision.

- Council School District, Council, ID. (Grant \$ 510,000)

After a school bond election defeat in May of 2004, the District regrouped and provided extensive education to the district's voters. In November, another bond election was held in which the people approved, by 74%, a 2.7 million dollar energy renovation project including a biomass boiler heating/air cooling system of four school buildings. Project is planned to be complete by fall of 2005.

*(Photo Right: Council School Building Complex, Aerial View – Nov 2004mt)*

- Boundary County School District, Bonners Ferry, ID. (FFS Grant \$303,600), sited in last years report, was returned by the District due to economic problems in the District which precluded completion of the FFS project.

- Kellogg School District has been offered a \$381,000 FFS grant. The District is in the process of selecting an ESCO contractor to accomplish an energy audit on the Districts school buildings. This will be completed shortly and selection of one or two schools for biomass heating conversion is anticipated by February 2005. Project completion is planned for fall of 2005.

# APPENDICES

**Agency Updates as Provided**

## **COEUR D'ALENE TRIBE**

### **FUELS PROGRAM ACCOMPLISHMENTS FY 2004**

The fuels program had a very successful year in 2004. The new funding from the National Fire Plan initiated substantial work at several sites around the reservation. The work was accomplished as 40 different treatments using both contract crews and Tribal staff. A fuels crew of 4 was hired mid-season to supplement the fire crew in doing some of the hand work and burning. Contracts were let on thirty (30) projects to approximately twenty (20) different contractors with up to 8 contractors working simultaneously.

The fuels program also provided funding to the GIS shop to initiate the Wildland Fire identification Planning project.

Projects were initiated in several areas around the reservation. In Plummer we completed the first round of work around tribal housing and on the tribal allotments. In addition the south and west edges of Plummer were treated with a series of projects on Tribal and private lands. Approximately 181 acres have been treated in the Plummer area. The Sub-Agency and Agency Road also received substantial work in the FIREWISE program with approximately 120 acres treated.

In Worley we completed work around Tribal housing and are currently working on the Osprey 3 area with another contract. Several landowners in the Plummer-Worley area have also expressed interest in participating in the Tribal FIREWISE program either through contractors or self contract. In 2004 we treated approximately 214 acres in the Worley area including some areas that have been treated twice.

In Cave Bay we have continued the work that was initiated in 2003 by the Kootenai County FIRE SMART program and have over 80 landowners participating at the present time. In 2004 we have treated approximately 150 acres once and about half of them have been treated twice.

Along the State Line allotments north of Tilma, we have treated the majority of the lands along the State Line Road and have contracted or completed 360 acres of hazard fuel reduction projects.

We began burning in some of these units in late September and plan to continue as long as conditions are favorable.

Fuels also participated in the interagency project to develop the Benewah County Wildland Urban Interface (WUI) hazard assessment and the steering committee for the Kootenai County WUI Task Force.

Funding was also received in 2004 for a new BOBCAT T-300 with brushing heads to allow the Tribe to do some of the treatment and re-treatment with internal staff. The machine is expected to be delivered early in FY 2005.

## Bureau of Indian Affairs

*Fort Hall Agency*

*Ed Christy, Fire Management Officer*

*P.O. Box 220 Ft. Hall, Id 83203*

Bus (208) 478-3785 \* Fax (208) 478-3788

**Date:** 02/22/2005

**Time:** 1330 pm

The Ft. Hall Agency and Shoshone Bannock Tribes continued the Hazard Fuel Reduction and Wildland Urban Interface Projects on the Ft. Hall Reservation.

All project-planning phases were completed and approved in subsequent years (2002/2003), with project implementation in late '03. 2004 saw the implementation of the Bannock Creek Wildland Urban Interface project (WUI), Mt. Putnam Hazard Fuel Reduction Project (HFR), and the continuation of the Ft. Hall Bottoms Hazard Fuel Reduction Project (HFR).

Community education began in Ross Fork, and approval from landowners to initiate fuel reduction treatments on individual trust lands obtained.

### **Spring 2004:**

The Ft. Hall Bottoms (HFR) broadcast burn began in March '03. The objectives of the bottoms burn were to reduce fuel loading and improve wildlife habitat and plant diversity. The Ft. Hall Bottoms is located on the mid-east portion of the reservation next to the American Falls Reservoir.

The burn unit was approximately 124 acres, with 126 acres being burned. The use of the Sho-Ban wildland firefighters, along with the assistant of the Bureau of Land Management and the Fish and Wildlife Service, help implement the prescribed burn.

Collaboration with the Shoshone Bannock Tribes Resource Dept. and the Tribes GIS dept. was helpful during all phases of this project. Other treatment for this area included mechanical treatment with pile burning in '03, with a total acreage of 126.

**Bannock Creek (WUI)** project implementation began shortly after the Ft. Hall Bottoms burn. The National Fire Plan funding was contracted to the Shoshone Bannock Tribes, and a fuel reduction crew was hired to implement the project. The Bannock Creek (WUI) is located along the Arbon Valley road located in the southern portion of the reservation.

Approximately 38 acres of treatment were completed on the Bannock Creek WUI project. Treatments included mechanical removal, piling, burning, and chipping.

*Typical home site on Bannock Creek WUI project, homes surround by grass/sage fuel types.*

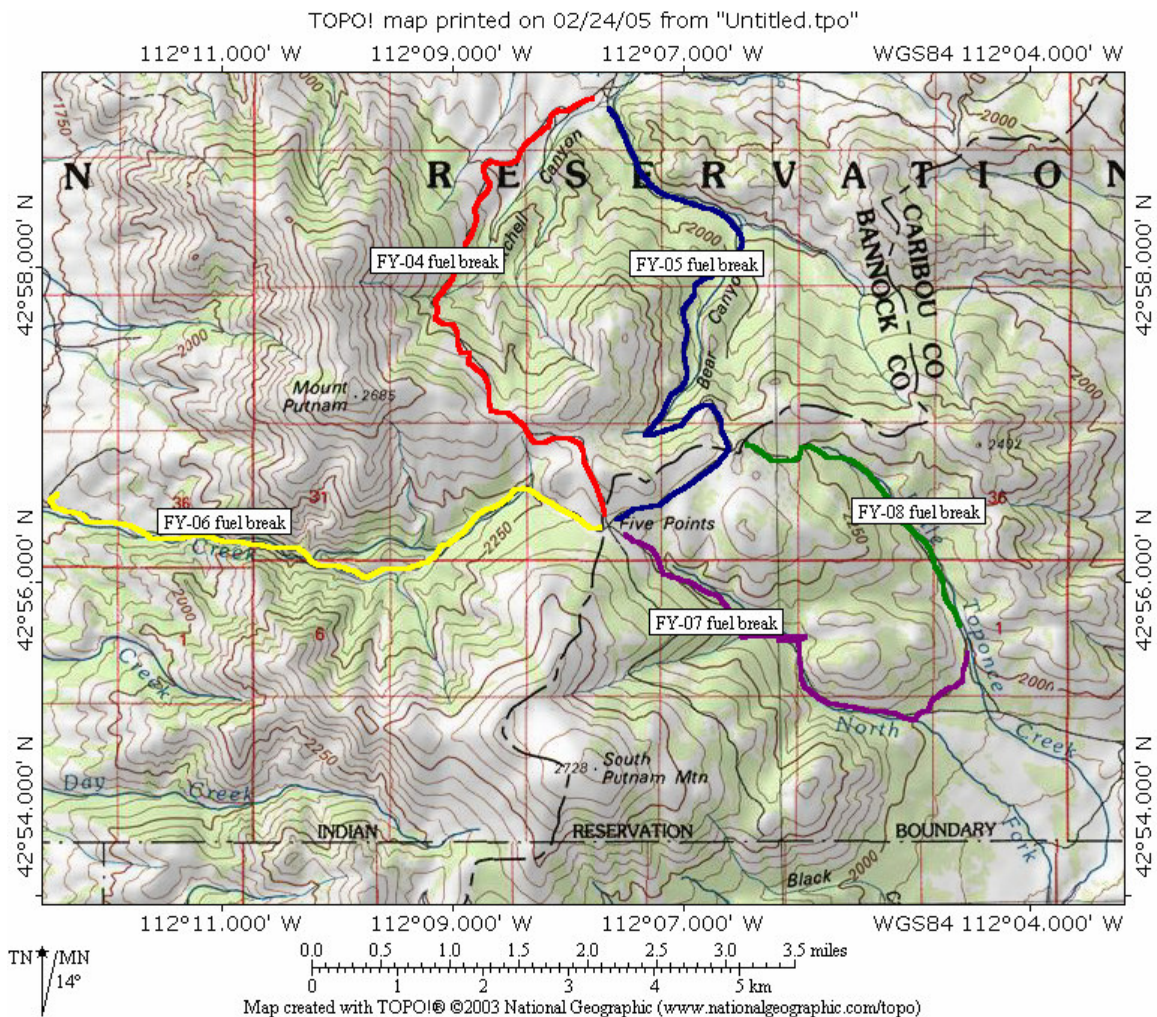

### **Mt. Putnam Hazard Fuel Reduction Project (HFR).**

The Mt. Putnam (HFR) project began in late summer (August). National fire Plan funding for this project was contracted to the Tribes and fuels crews hired through the Tribes. This is a continuing project and is expected to take multiple years to complete.

*Fuel loading example on Mt. Putnam (Right)*

Proposed hazard fuel reduction vicinity map of Mt. Putnam. As stated earlier, the Putnam (HFR) project began in late summer 2004 and continues as weather permits.

#### **Ft. Hall Agency/Shoshone Bannock Tribes Project Implementation:**

<b>Project Name</b>	<b>Treatment Date</b>	<b>Acres Completed</b>
Ft. Hall Bottoms	Broadcast Burn	126
Mt. Putnam HFR	Thin & Pile	10
Bannock Creek WUI	Thin & Pile	15
Bannock Creek WUI	Pile Burn	8
Bannock Creek WUI	Chip	7

## Nez Perce Tribal Forestry/Fire Division Update

The Nez Perce Tribal Forestry/Fire Division receives money from the Bureau of Indian Affairs (BIA) Northwest Regional Office (NWRO) to complete treatments and planning activities in conjunction with the National Fire Plan. This money is available from two programs: Wildland Urban Interface (WUI) and Hazardous Fuels Reduction (HFR).

Wildland Urban Interface projects and activities may be conducted on tribal trust and restricted land, tribal fee, private, state, and federal property located in and adjacent to tribal communities. Agencies and tribes are cautioned to assess liability issues associated with the application of any treatment on non-tribal land. Hazardous fuels reduction (non-WUI) projects will be conducted on tribal trust and restricted land only. The only exception to this policy is where planning and implementation of projects on non-tribal property is a collaborative effort with the neighboring agency. This type of project is justified for cost effectiveness, firefighter/public safety, and/or community protection of property. (BIA Fuels Program Business Management Handbook, April 2004)

The Nez Perce Tribal Forestry/Fire Division's WUI work in the past has occurred mainly on Tribal Trust Lands, with a few acres accomplished on private lands. Over the past year, there has been more coordination efforts with the Idaho Department of Lands to provide National Fire Plan funding for fuels treatments and fire prevention opportunities on private lands within the Nez Perce Indian Reservation. WUI fuels treatments occurring on Tribal lands during 2004 included:

- Defensible space projects around residences
- 40 acres of spraying noxious weeds and reseedling with competitive grass seed mixes
- 50 acres of brush reduction by pile and burn methods or shredding/mulching activities
- 110 acres of thinning pre-commercial trees and resulting slash management activities
- 20 acres of prescribed burning
- Future fuels planning activities on the Reservation
- 880 acres of goat browsing for brush and noxious weed reduction

Goats browsing on mature brush

Treatment after goat browsing

The ***Student Conservation Association (SCA) Fire Monitoring Team*** was responsible for measuring and monitoring the effectiveness of fuels treatments from June to November.

- ***The Student Conservation Association (SCA) Fire Education Corps*** is a major initiative designed to help property owners protect their homes from wildland fire. Fire Education Corps teams are made up of volunteers from around the country, trained in wildland-urban interface education and property evaluation. Team goals include raising wildland fire awareness and reducing wildfire risks through community outreach and education, fuels reduction projects, and collecting data for fire fighting agencies. The 2004 team has been involved in numerous activities that have helped them achieve their goals for the year. Some of the highlights are as follows:

- *Property Evaluations-* Team Nez Perce focused their energy on the reservation over the summer months and then joined in effort with interagency partners during the fall. Canvassing was done in collaboration with the Idaho Department of Lands (Maggie Creek FPD) and the U.S. Forest Service (Kooskia Ranger Station). All homes in the towns visited received fire education material. 130 home owners agreed to home assessments and were evaluated in the areas of Winchester, Lapwai, Syringa/Lowell, and Caribel.

- *Community Outreach and Education-* Outreach and education were accomplished in many different ways. A presentation on general defensible space aspects and fireworks safety was conducted at the Lapwai Boys and Girls club during the Fourth of July week. The SCA Team utilized a defensible space home model and put on a brief fireworks display to get their fire message across creatively. A firewise home preparation presentation will take place in January of 2005 from the cooperation of the Museum of Winchester History, Winchester Lake State Park, Hell's Gate State Park, the Washington State University Master Gardner's Asotin County Extension, and the SCA.
- *Fuels Reduction Projects-* Demonstration homes were chosen for the team to model good firewise landscaping. A total of six homes sites were chosen in Lapwai, Winchester, and Syringa/Lowell. Two defensible space treatments were completed with the teamwork of the Idaho Department of Lands and SCA in Syringa.

HFR fuels treatments occurring on Tribal lands during 2004 included:

- 40 acres of brush reduction by pile and burn methods or shredding/mulching activities
- 375 acres of thinning pre-commercial trees and resulting slash management activities
- 1640 acres fenced with barbed wire and water improvements for grazing activities.

## Idaho Bureau of Homeland Security Update

The Bureau of Homeland Security exists within the Military Division under the Executive Office of the Governor. It is broadly tasked (IC 46-10) with ensuring that Idaho's counties are able to respond to emergencies and disasters, both natural and man-caused, by having an organization capable of directing and coordinating response and recovery activities. BHS assists counties and cities in developing plans, in training personnel to implement the plans, and in exercises to test the operation of the plans. Emergency management is based on the principle of self-help, and BHS also assists jurisdictions in establishing mutual assistance compacts with each other for situations in which local resources are unable to meet the needs of the event. When resource needs exceed local capabilities, BHS facilitates State and Federal assistance.

BHS supports counties with area field officers in Coeur d'Alene, Lewiston, Boise, Twin Falls, Pocatello, and Rigby who provide insight into local issues and deliver State services tailored to their regions.

BHS is also tasked to recommend strategies to reduce, or mitigate, the harmful effects of disasters. In carrying out this task, BHS administers Federal grants from the Federal Emergency Management Agency/Department of Homeland Security to assist counties in developing plans for reducing the structural, economic, and social impact of earthquakes, landslides, interface fires, floods, and severe storms. BHS also assists communities to implement projects identified in their plans.

### Funding for Mitigation Planning and Projects

Planning is a prerequisite for project implementation. BHS develops and maintains a state plan for hazard mitigation to ensure State eligibility for Federal disaster assistance programs. Federal law also requires that counties and communities have local all-hazard mitigation plans in order to be eligible for Federal assistance for mitigation projects. Federal regulations define the form and content of these plans, and BHS provides funding to counties to develop their own plans.

Though the requirements are for plans that address multiple hazards, BHS recognizes that not all counties have the financial resources to complete all-hazard plans initially. Therefore, communities that have an identified hazard from wildland urban interface fires can begin the planning process with this hazard and expand it as resources allow. For this reason, the format of the FEMA-required plan will facilitate further updating.

#### **Our mission is:**

To save life and to limit human suffering, injury to wildlife, damage to natural resources, private and public property, the environment and the economy as a result of the harmful affects of natural and man-caused disasters, from all hazards, including terrorism and the use of Weapons of Mass Destruction, in support of local governments and communities.

## Idaho Fire Chiefs Association Update

### Fire Prevention Grant Program a Success!

The Idaho Fire Chief's Association (IFCA) has successfully concluded their administration of a \$150,000 grant program that was obtained through the combined services of the Idaho Department of Lands (IDL), the U.S. Fish & Wildlife Service, the U.S. Forest Service and the Idaho State Fire Plan Working Group - which is comprised of 14 agencies.

Grant awards went out to fire departments and agencies across the state with an emphasis on fire prevention, especially in wildland urban interface areas, which are constantly increasing and comprise much of Idaho. Grants helped to fund public fire safety education programs, fuel reduction programs, firefighter safety / training programs and to provide a cache of comprehensive fire prevention materials for Idaho firefighters and the public.

One of the grants went to the State Fire Marshal's Office (SFMO), in conjunction with the State Department of Insurance, to fund a statewide "senior citizen" fire safety program that will reach Idaho seniors in every corner of the state providing useful fire prevention and life saving fire safety information. Many seniors live in rural, wildland urban interface zones where fire prevention indoors and outdoors is critical to their safety. Another grant was awarded to update the SFMO's aging "lending library" of audio visual materials that are available to all fire agencies on a loan basis, upon request.

The IFCA extends its sincere appreciation to the IDL for obtaining the grant funds from the federal government. The IFCA also extends its thanks to our Idaho Congressional delegation who helped to get those funds appropriated for use in Idaho.

IFCA President Ben Estes said, "This grant program was certainly a team effort that paid big dividends for Idaho's fire service and all the citizens they proudly serve. Ninety percent of the grant funds went directly to grant recipients with only ten percent being used for administrative costs. This is an excellent ratio with such a large and diverse grant program."

Ms. Peg Polichio, Idaho's National Fire Plan Coordinator told IFCA representatives that the IFCA's grant program was "one of the most successful in the state," and added that Idaho's grant program administration is recognized as "one of the most effective in the Nation."

## USDA FOREST SERVICE – 2004 AGENCY UPDATE

United States  
Department of  
Agriculture

Forest  
Service

Boise  
National  
Forest

1249 South Vinnell Way, Suite 200  
Boise, ID 83709-1663  
208-373-4100

File Code: 5100

Date: June 8, 2004

Honorable Dirk Kempthorne  
Governor of Idaho  
Statehouse, Box 83720  
Boise, ID 83720

Dear Governor Kempthorne:

I am writing on behalf of the National Forest Supervisors in Idaho to provide you an update on our work to reduce the threat of wildfires to local communities. I am pleased to report our work has accelerated across the National Forests in Idaho in 2004, and the number already surpasses totals from last year. More than 40,000 acres of National Forest System lands have been thinned or burned since the beginning of fiscal year (FY) 2004 (October 1, 2003). The work completed for the first 7 months already surpasses the 23,000 acres achieved in FY 2003. The following table displays the information for each National Forest.

**Acres of Fuel Reduction on National Forests in Idaho  
FY 2003 and FY 2004 (to date)**

National Forest	FY 2003 (October 1, 2002, to September 30, 2003)			FY 2004 to date (October 1, 2003, to April 30, 2004)		
	Mechanical Treatment	Prescribed Fire	Total	Mechanical Treatment	Prescribed Fire	Total
Boise	852	1,332	2,184	416	7,011	7,427
Caribou-Targhee	2,107	1,238	3,345	120	1,525	1,645
Clearwater	1,042	3,083	3,083	490	4,357	4,847
Idaho Panhandle	4,175	2,200	6,375	664	5,202	5,866
Nez Perce	95	1,841	1,936	0	11,916	11,916
Payette	200	400	600	0	4,615	4,615
Salmon-Challis	0	3,375	3,375	0	3,928	3,928
Sawtooth	365	1,851	2,216	710	2,395	3,105
<b>TOTAL</b>	<b>8,836</b>	<b>15,320</b>	<b>23,114</b>	<b>2,400</b>	<b>40,949</b>	<b>43,349</b>

Please notice the number of acres of mechanical treatment to date for 2004 currently lags behind the total for 2003. We expect this to change in the coming months because most of our mechanical fuels treatment projects are scheduled for implementation this summer. For example, on the Boise National Forest, we plan to complete 970 acres of mechanical fuels treatment, which will exceed our accomplishment for 2003 by more than 100 acres.

The work in Idaho's forests is accomplished by a variety of methods. In some cases, small trees and brush are burned where they stand through one or more prescribed burns. In other cases, trees are thinned and piled, chipped, or sold if marketable timber is present. Favorable weather conditions this spring allowed us to accomplish much on the ground. We also expect some prescribed burning may occur in September or October on days that allow safe burning.

Caring for the Land and Serving People

Printed on Recycled Paper

Our efforts are part of the National Fire Plan that emphasizes, in part, the reduction of wildland fuels from forests. As you are aware, removing built-up fuel that feeds fires is a top priority for the Forest Service and other land management agencies in Idaho. In addition to the work occurring on the eight Idaho National Forests, hazardous fuel reduction occurs on lands managed by the Bureau of Land Management and the Idaho Department of Lands, as well as on private lands.

We appreciate the efforts of the Idaho State Fire Plan Working Group, a statewide interagency group that prioritizes and coordinates work to reduce community risks from wildfire. We also recognize the partnership between the Forest Service and the Idaho Department of Lands, and the \$11 million in state and federal funds managed by the Idaho Department of Lands. These resources assist local governments with hazardous fuel reduction projects and provide public fire prevention and education.

Since the inception of the National Fire Plan in 2001, more than 3,300 acres of hazardous fuels treatment has occurred on non-federal lands in Idaho. Counties, local emergency planning committees, resource conservation and development associations, fire districts, homeowners' associations, and homeowners have completed these community defensible space projects.

I believe the best way to sum it up is to echo what Lemhi County Commissioner Robert Cope said in our recent news release: "Protection from wildfire is vital to nearly every community in Idaho. As the counties move forward with their mitigation plans, all residents and landowners--public and private--will reap the benefits."

Please contact any Idaho Forest Supervisor or me if we can answer any questions or provide more information.

Sincerely,

/s/ Richard A. Smith  
RICHARD A. SMITH  
Forest Supervisor

Update

# **Idaho Bureau of Land Management Update**

“Protect communities and environments while promoting economic sustainability”

2004 brought several changes to Idaho BLM including a reorganization of our District office boundaries, a new State Fire Management Officer (Leonard Wehking) and a move from planning to implementation as the last 7 counties were funded to complete wildfire mitigation plans. Below are some brief highlights of our accomplishments beyond those listed in this report.

- **Treated 108,000 acres of hazardous fuels** at a cost of \$8.2 million (see breakdown of treatments on next page). 48% of those treatments were contracted out to private businesses. Entered into 4 Stewardship Contracts
- **Continued focus on fire prevention & education.**
  - \$131,000 spent on media campaign for Keep Idaho Green (KIG) TV, radio and billboard messages.
  - Completed 3 new KIG “firewise” displays for interagency use
  - Distributed 28,000 “FireWise – inside & out” doorhanger brochures which combine home and wildland fire prevention & safety messages
  - Provided \$2,500 toward “Burning Issues – Fire Ecology Workshop” at the University of Idaho Field Campus in McCall, ID, in cooperation with Project Learning Tree.
  - Fire resistant landscaping workshop in Idaho Falls on April 2
- **Established a new grant program with IDL for 2005** (similar to USFS Stevens Funds). Dollars will be used for private ground fuels treatments adjacent to BLM fuels projects. Plan is to make these dollars available in the spring of 2005.
- **In 2005, Idaho BLM has roughly \$400,000 available for Community Assistance** which includes wildfire assessments and plans and “other implementation actions” that reduce risk such as education, WUI code adoption, community clean-up events, firewise workshops, home evaluations, etc.

**Below are the top Bureau priorities we consider when funding projects:**

- Project is identified in a county mitigation plan
- Community/County is vested in project with interagency involvement
- Stewardship contracting or biomass use potential
- Implementation can be done under Healthy Forest Restoration Act authority
- Mechanical treatments that are contracted out to Idaho businesses
- Vicinity of federal land
- Project is in priority fire regime/condition class (unhealthy lands where fire burns frequently)

**\* New District boundaries for Idaho BLM in 05** (Salmon & Challis moved to Idaho Falls District. Jarbidge moved to Twin Falls District)

## \* National BLM Fuels Treatment Statistics for fiscal year 2004

# Idaho Resource Conservation and Development Association State Fire Plan Annual Report

Report of RC&D Activities Relative to Implementing the National Fire Plan  
Prepared by Russ Manwaring, West Central Highlands RC&D

## Clearwater RC&D Council, Inc. – Moscow, ID

### ❖ **County Wildland Fire Mitigation Plan (Upgrade) (for all of Clearwater, Idaho, Latah, Lewis and Nez Perce counties)**

Planning process started in 2001 with first version completed summer, 2003. All five plans are in updating/upgrading process to be compliant with FEMA, Idaho NFP Strategic Fire Plan requirements, and Healthy Forests Restoration Act of 2003. Revised plans will include mitigation recommendations for all “communities” as listed in NFP discussion in Federal Register. Funding for contract to update plans from existing BLM Assistance Agreement.

### ❖ **National Fire Plan IDL-FS Fire Projects**

Initiated in 2003, this project utilizes carryover Forest Service NFP funding through the Idaho Department of Lands to develop public education activities, mitigation/demonstration projects and support activities in wildland interface areas. Three projects tied to this NFP funding completed in 2004:

- Moscow Mountain Defensible Space Door to Door Education Activities—local contractors made 85 on site face-to-face visits resulting in completed home evaluations. Approximately 390 homeowners in the Moscow Mountain area of Latah County were contacted and/or provided information.
- Elk City Community/Residential Defensible Space Work--local Elk City Area Alliance conducted on-the-ground hazardous fuels reduction activities for four homeowners.
- Upper Deer Creek Drainage Defensible Space Demonstration --Five home sites (immediate area of wildfire influence) and a home site access road near White Bird, ID were treated according to IDL-HFT standards and guidelines. RC&D contractor performing the work was Framing Our Community, Inc. Included meetings, home assessments, FireWise education materials, mapping/GPS work, travel, and overhead. Funding for all three projects: IDL

### ❖ **Fire Management Activity Plans**

In 2002, the Clearwater RC&D Council entered into contract with a local consulting firm to develop two fire management activity plans in the Little Salmon River and Elk City polygon areas for the Bureau of Land Management’s Cottonwood Field Office. Final drafts submitted to BLM in June 2003. No further review action by BLM, because of a change in priorities. RC&D contract complete. Funding: BLM.

### ❖ **Wet Gulch Fuel Breaks**

RC&D entered into agreement in 2001 with the Idaho Department of Correction, providing work crews and supervision for constructing fuel break corridors in the Wet Gulch area of John Day Creek watershed in Idaho County on land managed by the BLM. Work has continued on this project and is ongoing. Funding: BLM.

### ❖ **2004 Nez Perce Tribe Fire Education Corps Team**

The Nez Perce Tribal Forestry Department handled the funding and sponsored a Student Conservation Association Fire Education Corps Team, focusing primary efforts in the Clearwater Valley area of North Central Idaho within the Nez Perce Reservation. Some work outside of the reservation boundary was performed in the Kamiah, Grangeville, Orofino and Kooskia areas. Funding: USDI Bureau of Indian Affairs.

❖ **BLM Cottonwood Field Office “Area Wide” Fire Management Plan**

Clearwater RC&D Council contracted this work to North Wind, Inc. in Idaho Falls, ID. Complete August, 2004. A district-wide fire management plan was developed to determine how prescribed fire, wildland fire used for resource benefit, and fire suppression can be used to meet objectives identified in BLM's Framework Management Plan. The FMP discusses potential work on federally managed BLM land as well as other affected lands. Funding: BLM.

❖ **Region II National Fire Plan Projects Support/Development/Coordination**

A contract was developed between the RC&D Council and two independent contractors, completed in December, 2004. The pair of contractors worked as a team and made numerous contacts with rural and city fire district personnel and other people involved with fire protection within the five county RC&D area. They have provided some very good insight and suggested a number of recommendations that are critical to better wildland and structural fire protection in the area. Funding: BLM.

**Contact information: Dick Hodge, Chair, CRC&DC Fire Project Steering Committee, Moscow, ID; (208) 882-2672 [djhodge@turbonet.com](mailto:djhodge@turbonet.com); RC&D Office (208) 882-4960 Ext. 102 [crcdc@moscow.com](mailto:crcdc@moscow.com)**

### **High Country RC&D – Rexburg, ID**

- ❖ The HCRC&D has partnered with the Lemhi County Commission and the USDA – Forest Service to implement a hazardous fuels reduction demonstration in Lemhi County. Lemhi County provides the initial screening of potential demo sites as well as onsite planning assistance. To date a total of 15 demonstration projects have been completed in the Sheep Creek and Gibbonsville area. Eight projects were completed during 2004.
- ❖ During 2004, the HCRC&D provided logistical support and administrative services to:
  - Completion of the Custer County Wildfire Mitigation Plan.
  - Development of a Custer County Rural Addressing System.
- ❖ The HCRC&D is currently working with home owners in Teton County, Bonneville County, and Custer County to implement several hazardous fuels reduction demonstration projects in the spring of 2005. These HCRC&D has provided on site and risk assessments and is in the process of developing individual contracts.

**Contact Information: Gerald Jeppesen, Chairman, [Jeppesen1@msn.com](mailto:Jeppesen1@msn.com); (208) 356-5213 x 117**

### **Panhandle Lakes RC&D – Coeur d'Alene, ID**

- ❖ The RC&D continues to host the Fuels for Schools program manager for the State. Two projects are underway.
- ❖ The RC&D Coordinator serves as a member of the Kootenai County Wildland Urban Interface Committee. This committee has sponsored and completed many successful WUI projects.

**Contact Information: Dan Dinning, Chair; [commissioner@boudarycounty.org](mailto:commissioner@boudarycounty.org); (208) 762-4939 x 114**

### **Southwest Idaho RC&D Council, Inc. – Meridian, ID**

- ❖ The Fire Mitigation Plan for Elmore County completed in May 2004
- ❖ The Fire Mitigation Plans for Ada and Canyon is on going
- ❖ Continue to work on the I-84 fuelbreak in Elmore County to reduce motorists cause fires from spreading to rangelands
- ❖ The Council has contracted Northwest Management to complete All Hazard Mitigation plans for Ada, Canyon and Elmore Counties
- ❖ The RC&D assisted the fire districts in Boise, Middleton, Mountain Home, Notus and Star to receive Presidential Wildfire Initiative equipment grants
- ❖ Fire Education presentations to groups in Ada, Canyon and Elmore Counties

**Contact Information:** Robbin Finch, Chair; [rfinch@cityofboise.org](mailto:rfinch@cityofboise.org); (208) 888-1890 x 4

### **Three Rivers RC&D Council, Inc. – Pocatello, ID**

- ❖ **Firewise Communities / USA**
  - Development of a Firewise Community committee in Johnny Creek – Johnny Creek Firewise Community should be confirmed in early 2005.
  - Scheduling and conducting home evaluations/Firewise education in several areas of Bannock County
- ❖ **Public Relations / Outreach**
  - Development of monthly column in the Idaho State Journal “*Firewise*”
  - A WFEP brochure development, describing WFEP goals, objectives, and programs, including the new cost share program - placed in areas frequented by the public.
  - Development of the WFEP website
  - Development of a 5 minute video on defensible space and fuel reduction assistance information, completion scheduled for April 2005.
  - Development of three-panel display for meetings as well as small desktop displays on WFEP with sleeve for brochures.
- ❖ **Fuel Reduction Projects / Firewise Cleanups**
  - Lava Ranch homeowners taking advantage of the Chipping Project in their community;
  - One neighborhood fuel reduction project – Catus/Sage neighborhood (Johnny Creek).
  - Development of the Fuel Reduction Cost Share Program- this program is designed to fill a void in the WFEP as it assists homeowners who are physically unable or do not have the time to reduce fuels on their own.
- ❖ **Fire Education Team**
  - RedZone Surveys (800)
    - 207 homes in Downey,
    - 188 in the Jackson Creek,
    - 202 in the Pocatello Valley Fire District (Mink Creek Area)
    - 203 in the Chubbuck Fire District (Pocatello Creek Area)

- Wildland Fire Home Evaluations
  - Lava Hot Springs Fire District (Lava Ranch Area) – 13
  - Pocatello Valley Fire District (Mink Creek/Gibson Jack Areas) – 2
  - Chubbuck Fire District (Pocatello Creek/Buckskin Areas) – 2
  - Pocatello Fire District (Johnny Creek Area) – 1
- Canvassing in Downey and Inkom (Jackson Creek) fire districts

**Contact Information: Kent Rudeen, Chair, [krudeen@dcdi.net](mailto:krudeen@dcdi.net); (208) 237-4628 x 104**

#### **West Central Highlands RC&D Council, Inc. – Emmett, ID**

- ❖ The RC&D Contracted with Northwest Management, Inc. and completed Fire Risk Assessment and Mitigation Plans in Adams, Gem, Payette, and Washington Counties
- ❖ Northwest Management was also retained and completed All Hazard Mitigation plans in December 2004 for Adams, Boise, Gem, Payette, Valley and Washington Counties
- ❖ A Fire Educator was hired, utilizing a grant from the BLM, and community fire planning presentations were made to various groups in Adams, Boise, Gem, Valley and Washington Counties
- ❖ The RC&D Forestry Consultant continued working with subdivision groups and has set up four new hazardous fuel treatment demonstrations that will occur in the spring of 2005
- ❖ A Consultant was retained and has begun site evaluations in preparation for the Fuel Reduction project in the Castle Mountain Subdivision in Boise County
- ❖ A 2005 WUI grant was prepared and received priority for consideration at the Western Fire mangers WUI Meeting

**Contact Information: Ken Roberts, Chair; [intarsia@ctcweb.net](mailto:intarsia@ctcweb.net); RC&D Office (208) 365-4475 x 4; [wchrcd@idahorcd.org](mailto:wchrcd@idahorcd.org)**

#### **Wood River RC&D Council, Inc. – Gooding, ID**

- ❖ The county-wide fire mitigation plans for Camas, Gooding, and Lincoln counties are completed
- ❖ We are working on some demonstration projects for 2005, should the grant be approved.

**Contact Information: Rusty Parker, Chair; (208) 934-4149 x 109**

# Keep Idaho Green

<http://www.keepidahogreen.org>

## KIG Overview and Mission

Keep Idaho Green is an organization that is dedicated to the prevention of wildfires in Idaho. It is administered by a committee of individuals from the United States Forest Service, the Bureau of Land Management, and the Idaho Department of Lands. The focus of the prevention effort is to educate citizens on steps that they can take to prevent wildfires and how they can make their homes safer in the event of a wildfire. KIG promotes the fire prevention message via Firewise workshops, the media (TV, radio, newspaper, roadside billboards, and the internet), painted road signs, and involvement in community events and organizations (fairs, school programs, etc).

## Coordination of Fire Prevention Efforts

KIG works with fire prevention personnel from various fire protection agencies and organizations to create and distribute fire prevention messages that are targeted to specific communities. KIG assists communities with the creation of fire prevention cooperatives and works with existing cooperatives on local projects and the distribution of fire prevention messages. Fire prevention cooperatives typically consist of members of area fire departments and local USFS, BLM, and IDL personnel. These groups have the most accurate information on the fire prevention needs for their area. They are also the most effective communicators to their communities.

KIG also researches the efforts of organizations and companies that have a related interest in fire mitigation. This includes building code officials, home insurance companies, forestry programs at universities, etc.

## Funding

KIG coordinates with fire protection agencies and organizations throughout the state to determine funding requirements and material needs for fire prevention. KIG applies for federal grants throughout the year for projects and informational materials to be carried out in communities. In addition, KIG receives funding from its participating agencies.

## Focus for 2005

KIG will be reviving the annual poster contest for children that had been popular in previous years. Other areas of focus outside of public education will be assisting local fire departments with home assessments and working with building code officials to incorporate applicable portions of the International Wildland/Urban Interface code into building codes.

# KEEP IDAHO GREEN Displays and Billboards

**Fire Season**  
is coming...is your home ready?

**Landscape With Fire Resistant Plants**

- Avoid locating evergreens and wood chips next to the house.
- Water and maintain a green lawn.
- Trim shrubs and trees regularly and remove any dead plant material.

**Build With Fire Resistant Materials**

- Use Class-A asphalt shingles, metal or clay tile roofing.
- Clean under decks and screen in pests or litters with 1/8 inch screen.
- Keep gutters, eaves and roof down of needles, leaves and other debris.

**Create Survivable Space**

- Make firebreaks with gravel paths, driveways and patios.
- Create easy access to your water sources.
- Keep woodpiles, propane tanks and debris 30 feet away from your home.

**It's Up To You**

- Unlike other natural disasters, fire loss is preventable.
- Your home and property can be pleasing to the eye and fire resistant.
- You don't have to spend a lot of time and money... but you must act before smoke is in the air.

**Little Things Make a BIG Difference**
